Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Claims 1-31 are presented for examination on the merits.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on July 23, 2003 was received. The submission is in compliance with the provisions of 37 CFR 1.97.

Accordingly, the information disclosure statement is being considered by the examiner.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cochran in view of Kato et al, McCarty, Riley et al, and Leslie et al., all cited on the enclosed PTO-892 Form and PTO-1449 Form.

Claims are drawn to a composition, comprising aspirin, magnesium and nattokinase and either niacin or nitroglycerine. Also Coenzyme Q, lipoic acid and amino acids are included in the composition.

Cochran discloses a composition comprising Coenzyme Q, niacin, amino acids, vitamins, lipoic acid, see column 17, lines 25-68 and column 18, lines 40-45. Also note column 20, all lines and Column 22, all lines.

Kato et al teach a composition comprising Nattokinase, see the abstract.

McCarty teaches a composition comprising magnesium, see the abstract.

Leslie et al teach a composition comprising nitroglycerine, see the abstract.

Riley et al teach a composition comprising aspirin, see the abstract.

The claims differ from Cochran in that various active ingredients are not disclosed.

It would have been obvious to one of ordinary skill in the art to combine the ingredients of the cited prior art to provide for a composition since each ingredient is well known in the art. To combine these ingredients of the cited prior art to provide for the composition is an obvious modification and one of skill would have expected successful results. To vary the amounts is clearly within the skill of an ordinary artisan. Thus, in the absence of persuasive evidence to the contrary the claims are prima facie obvious over the cited prior art.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
